github.com/Sweety3-hub | sweety3-hub.github.io

## PROFESSIONAL SUMMARY

B.Tech CSE student with a **9.49 CGPA** and hands-on experience in SQL, Python, Excel and Power BI. Built an end-to-end revenue-risk analytics project (PostgreSQL, Python, Power BI, Streamlit) plus churn and funnel dashboards that turn raw data into business recommendations. Completed a Data Analytics using Power BI internship with APSSDC. Seeking Data Analyst, Business Analyst or AI/Data internships and fresher roles.

## EDUCATION

**B.Tech, Computer Science and Engineering** | *Mohan Babu University, Tirupati* **Expected 2027**
**CGPA: 9.49 / 10**

## TECHNICAL SKILLS

**Data Analysis:** SQL, Python (Pandas), Excel, Data Cleaning, Data Transformation, KPI and Trend Analysis, Anomaly Detection

**BI & Visualization:** Power BI, DAX, Power Query, Streamlit, Interactive Dashboards, Data Visualization, Reporting

**Databases:** PostgreSQL, pgAdmin, Joins, Subqueries, CTEs, Window Functions

**Business Analysis:** Funnel and Conversion Analysis, Customer Churn and Retention Analysis, Revenue Risk Analysis, Business Recommendations

**Tools:** Git, GitHub, VS Code

## PROJECTS

**Real-Time Revenue Leakage & Customer Journey Intelligence** | *Python, PostgreSQL, Power BI, Streamlit* GitHub

- Built an end-to-end analytics project on simulated e-commerce data, using SQL and Python (Pandas) to analyze payment failures, customer journey drop-offs, returns and shipping delays.
- Surfaced key risk metrics: 21 failed payment attempts, ₹1.52 lakh potential payment risk, 54.87% delivery delay rate and 7 flagged payment anomalies.
- Delivered business recommendations through Power BI and Streamlit dashboards.

**Telecom Customer Churn Analytics** | *Power BI, Power Query, DAX* GitHub

- Transformed customer data in Power Query and built DAX measures for an interactive dashboard analyzing churn by contract type, tenure, services, charges and payment method.
- Identified higher-churn customer segments across demographic, contract and billing factors to support retention insights.

**E-Commerce Funnel Drop-Off & Cart Abandonment Analysis** | *Power BI, Power Query, DAX* GitHub

- Analyzed a five-stage purchase funnel (entry to purchase) to locate major drop-off points and cart abandonment patterns.
- Built an interactive Power BI dashboard with DAX measures; documented recommendations on checkout friction and cart-to-purchase conversion in a report and presentation.

**Sales Analysis** | *SQL, PostgreSQL, pgAdmin* GitHub

- Built a seven-script PostgreSQL project analyzing sales data with joins, GROUP BY/HAVING, subqueries, CTEs and window functions (ROW_NUMBER, RANK, DENSE_RANK).

## INTERNSHIP

**Data Analytics Intern (Power BI)** | *APSSDC Summer Online Internship, Batch 2* **May 2026 – Jul 2026**

- Completed a two-month government-sponsored internship on Data Analytics using Power BI via the Naipunyam portal.
- Worked on data analysis and Power BI report and dashboard development; earned a completion certificate.

## CERTIFICATIONS

- Cisco Networking Academy – Data Analytics Essentials
- LinkedIn Learning – R for Data Science: Analysis and Visualization
- Kaggle – Intro to SQL; Kaggle – Python
